Ground Work™

WATER BASED ACRYLIC POLYMER SEAL

Ground Work is an extremely durable acrylic polymer seal that offers an immaculate finish and longer service life when used for concrete, stone, marble, ceramic, tile and other non-resilient flooring. It gives equally superb results on old, new, rough, porous or smooth substrates. Ground Work has a non-solvent base, is safe and easy to use, easy to clean up and has a faster drying time than many solvent-type products.

FEATURES

- Non-solvent base, safer to use*
- Extremely durable, longer service life*
- Easy clean up, ease of use*
- Will not strip with ordinary strippers, longer service life*
- Exceptional adhesion to all concrete and stone compositions*
- High durability & resistance to wear and degradation*
- Excellent gloss, depth of gloss, leveling, recoatability, & penetration*

USES

- Asbestos Tile
- Composite Floors
- Asphalt Plank
- Ceramic Tile
- Rubber
- Vinyl Tile
- Concrete

PROPERTIES
